

Subject Index to Volume 25

- Acetate, kinetics, systemic and regional, E197
- Acetylcarnitine, caffeine ingestion, muscle metabolism and, prolonged exercise, E891
- Acetylcholine, insulin secretion and, pancreatic islets, E338
- Acidification, sodium-hydrogen exchange effects, FRTL-5 thyroid cells, E834
- ACTH: *see* Adrenocorticotropin
- Adenosine, glycogen metabolism, epinephrine and, during hypercorticism, E434
- Adenosine diphosphate, muscle, exercise effects, very-low-birth-weight infants, E289
- Adenosine monophosphate, cyclic fasting and, dephosphorylation of insulin receptor, E142
- modulation of IGF binding protein production, ovarian granulosa cells (pig), E497
- regulation, 25(OH)D-1 α -hydroxylase and PTH analogue, E483
- tissue specificity, renin promotor activity, E644
- Adenosine triphosphate depletion, calcium-dependent protein breakdown and, skeletal muscle (chick), E637
- muscle, exercise effects, very-low-birth-weight infants, E289
- viscosity, ³²P-NMR spectroscopy, heart, E943
- Adenylate cyclase
- benign and malignant squamous cells, PTHR binding and signal transduction in, E599
- protein kinase C and, osteoblasts, E87
- Adipocytes, size, adrenalectomy and high-fat diet effects, E32
- Adipose tissue
- adrenalectomy, high-fat diet effects and, E32
- brown: *see* Brown fat
- developmental regulation, lipoprotein lipase, E330
- insulin receptor function, hypoinsulinemia and insulin resistance in, E818
- lipoprotein lipase in, insulin and dexamethasone effects, E695
- white
- exercise-induced LPL reduction in, E377
- insulin receptor kinase activity, VMH obesity, E161
- ADP: *see* Adenosine diphosphate
- Adrenal cortex, steroidogenic enzymes, studies (guinea pig), E869
- Adrenal gland
- cortisol secretion, epinephrine augmentation of (guinea pig), E806
- sequential injections of CRF, ACTH response to, fetus (sheep), E319, E325
- Adrenalectomy
- central nervous system, brown adipose tissue metabolism and plasma insulin, E110
- high-fat diet and, fatty Zucker rat, E32
- α -Adrenergic agonist, epinephrine effects on cortisol secretion and, adrenal glands (guinea pig), E806
- β -Adrenergic agonist, calcium mobilization stimulated by, SK-N-MC cells, isoproterenol treatment and, E383
- Adrenocorticotropin
- β -cell concentrations, body weight correlation, obesity (monkey), E963
- release, brain kinins and, E312
- response, sequential CRF injections, fetus (sheep), E319, E325
- secretion, epinephrine effects, adrenal gland (guinea pig), E806
- Aging
- corticosteroid receptors, mononuclear leukocytes, E464
- 1,25-dihydroxyvitamin D metabolism, E906
- maturation and, skeletal muscle glucose transport system, E619
- obesity, glucose and insulin dynamics, model, E755
- plasma calcitonin levels, basal- and calcium-stimulated, female, E557
- thermogenesis and, E185
- AIB: *see* α -Aminoisobutyric acid
- Alanine, interorgan metabolism, TNF and interleukin-1 effects, awake state, E275
- Aldosterone
- action, hypertension in the Dahl S/JR rat, E96
- ANP and endothelin interaction effects, E135
- metabolism, liver, hypertension and, E488
- mononuclear leukocytes, aging, E464
- secretion, osmolality effects, E68
- Alkalinization, sodium-hydrogen exchange effects, FRTL-5 thyroid cells, E834
- Amiloride analogues, AVP antagonism and, cell contraction, E76
- Amino acids
- enteral and parenteral supply, leucine kinetics in relation to, E687
- infused, glucose production, healthy subjects, E826
- interorgan metabolism, TNF and interleukin-1 effects, awake state, E275
- kinetics, hyperinsulinemia effects, E911
- leucine and phenylalanine kinetics and, type 1 diabetes, E203
- metabolism
- growth hormone effects, exercise in young men, E261
- insulin-like growth factor I effects, E130
- postprandial kinetics, mixed meal ingestion, E455
- protein metabolism and, E925
- protein synthesis and, muscle, E372
- α -Aminoisobutyric acid
- sepsis-induced cascade, cytokine mRNA expression, E728
- transport, prolactin effects, mammary gland explants, E402
- Ammonia, heart rate and exertion relations, McArdle's disease, E167
- Ammoniogenesis, release of amino acid, muscle, E155
- Anesthesia
- circulating galanin, origin and elimination of (pig), E52
- general, effects on muscle protein synthesis, E253
- Angiotensin-converting enzyme, renin-angiotensin system, peripheral and central angiotensin II and, E651
- Angiotensin II
- aldosterone secretion stimulated by, osmolality effects, E68
- interactions with sympathetic nervous system and baroreceptor reflexes, blood pressure regulation, E763
- peripheral and central, expression of genes and, renin-angiotensin system, E651
- Angiotensinogen, renin-angiotensin system, peripheral and central angiotensin II and, E651
- ANP: *see* Atrial natriuretic peptide
- AT-20 cells, mouse renin biosynthesis in, E224
- ATP: *see* Adenosine triphosphate
- Atrial natriuretic peptide
- interaction with endothelin, cardiovascular, renal, and endocrine function, E135
- synthesis, atrial tumors, E524
- Atropine, cerebrovascular reactivity, diabetic brain, E447
- Autonomic nervous system
- glucocorticoids, brown adipose tissue metabolism and plasma insulin, E110
- increased islet blood flow, obesity and, E736
- Autoradiography, β -adrenoceptor distribution, hyperthyroidism, skeletal muscle, E504
- AVP: *see* Vasopressin, arginine
- Awake state
- fasting-refeeding transition, hepatic metabolism during, pregnancy, E899
- interorgan amino acid metabolism, TNF and interleukin-1 effects, E275
- Bicarbonate
- ¹³C-labeled, amino acid effects on glucose production, E826
- transport, thyroid, E40
- Blood flow: *see also* Circulation
- cerebral, receptor-mediated, response to streptozotocin treatment, E447
- pancreatic islets, increase in obesity, E736
- peripheral, β -adrenoceptor distribution, hyperthyroidism, muscle, E504
- Blood pressure
- endothelin-1 effects, E856
- prorenin effects, stroke-prone spontaneous hypertension, E234
- regulation, angiotensin II, sympathetic nervous system, and baroreceptor reflex interactions, E763
- vasopressin effects, REM sleep, E295

- Body**
composition, adrenalectomy and high-fat diet effects, E32
weight: *see* Weight
- Bone**
growth, linear, E936
mineral loss, lactation, parathyroid tissue and, E230
- Brain**
blood pressure regulation, E763
developmental regulation, lipoprotein lipase, E330
diabetic, cerebrovascular reactivity in, E447
kallikrein-kinin system, regulation of adrenocorticotropin release, E312
mineralocorticoid action, hypertension in the Dahl S/JR rat, E96
PGE₂ levels, IL-1 β intravenous injection effects, E246
Brown fat, metabolism, glucocorticoids in the CNS and, E110
Bumetanide, bidirectional anion transport, thyroid, E40
Caffeine, ingestion, muscle metabolism and, prolonged exercise, E891
Calcitonin, plasma levels, basal- and calcium-stimulated, age differences, female, E557
Calcitriol
low-calcium diet and, 25-hydroxyvitamin D₃ metabolism, E359
metabolism, aging and, E906
Calcium
concentration, intensity of lactation and, E840
cytoplasmic free, oscillation, IGF-I-induced, E307
cytosolic free, secretion, osmolality effects, E68
deficiency, 25-hydroxyvitamin D₃ metabolism, E359
intracellular, PTHRP binding, squamous cells, E599
mobilization, AVP antagonism by amiloride analogues, E76
oxidative stress, atrophied skeletal muscle, E583
parathyroid tissue, lactational bone mineral loss and, E230
plasma, levels during 1,25(OH)₂ vitamin D₃ infusions, E126
uptake, TM4 Sertoli cell line, E884
Calorimetry
indirect
amino acid effects on glucose production, E826
high-carbohydrate diet, postobese women, E282
cAMP: *see* Adenosine monophosphate, cyclic
Carbohydrates
oxidation, energy expenditure and, postobese women, E282
restriction, adaptive response to fasting and, E631
Carbon-13, condensation biosynthesis using, models, E118
Carbonic anhydrase III, genetic obesity, E608
Cardiac output, ANP and endothelin interaction effects, E135
Catecholamines
energy expenditure and, high-carbohydrate diet, postobese women, E282
galanin release, liver, during sympathetic nerve stimulation, E671
paraventricular, feeding-associated corticosterone rhythm and, E948
urinary, insulin secretion and, pancreatic islets, E338
Central nervous system
glucocorticoids, brown adipose tissue metabolism and plasma insulin, E110
mineralocorticoid action, hypertension in the Dahl S/JR rat, E96
Ceramides, prostaglandin E₂ synthesis and, skeletal muscle, E476
Chloride, transport, thyroid, E40
Circulation: *see also* Blood flow
galanin, anesthesia and (pig), E52
Clonidine, increased islet blood flow, obesity and, E736
Cold, response to, uncoupling protein gene regulation, E58
Composition, body, dietary effects on energy expenditure, postobese women, E282
Copper, trace element movement, movement, oxidative stress and, atrophied skeletal muscle, E583
Corpus luteum, oxygen radical activity, E173
Corticosteroids, receptors: *see* Receptors
Corticosterone, feeding-associated rhythm, paraventricular catecholamines in, E948
Corticotropin-releasing factor, sequential injections of, ACTH response to, fetus (sheep), E319, E325
Corticotropin-releasing hormone
central nervous system, brown adipose tissue metabolism and plasma insulin, E110
feeding-associated rhythm, paraventricular catecholamines in, E948
Cortisol
lipoprotein lipase and, adipose tissue, E695
mononuclear leukocytes, aging, E464
response, sequential CRF injections, fetus (sheep), E319, E325
rhythm, glucose and insulin in meals and, E467
secretion, epinephrine effects, adrenal gland (guinea pig), E806
vasopressin effects and, reduction of REM sleep, E295
CRF: *see* Corticotropin-releasing factor
Cycloheximide
IGF-I effects and, sodium-phosphate co-transport, osteoblasts, E389
prostaglandin E₂ synthesis and, skeletal muscle, E476
Cytochalasin, binding, maturation and aging effects, skeletal muscle, E619
Cytochalasin B, glucose transport and, skeletal muscle membrane vesicles, E700
Cytokine mRNA, expression, sepsis-induced cascade, E728

Decavanadate, lipoprotein lipase release and, myocytes, E663
Dehydrogenase, xanthine oxidase and, ovarian tissues, E173
11-Dehydrothromboxane B₂, thromboxane monitoring, body fluids, E658
2-Deoxyglucose, uptake, prolactin effects, mammary gland explants, E627

Development: *see also* Growth; Maturation
regulation of lipoprotein lipase, E330
Dexamethasone
central nervous system, brown adipose tissue metabolism and plasma insulin, E110
glycogen metabolism and, skeletal muscle, E427, E434
lipoprotein lipase and, adipose tissue, E695
Diabetes
acute insulin presence, rest and exercise, depancreatized dogs, E574
brain, cerebrovascular reactivity in, E447
complications, glucose inhibition of phosphatidylinositol synthase, E417
growth hormone-deficient, renal IGF-I and hypertrophy and, E956
lipoprotein lipase release, myocytes, E663
streptozotocin, renin-angiotensin system downregulation in, E105
type 1, leucine and phenylalanine kinetics in, insulin and amino acid effects, E203
upregulation of D-myo-inositol transport, glomerular cells
Diabetes mellitus
insulin action, short-term hyperglycemia and hyperinsulinemia effects, E518
pyruvate carboxylase, genetic obesity, E608
Diazoxide, insulin release and, pancreatic B-cells, E150
DIMSUM, multiexponential model discrimination, E546
Dopamine, receptors: *see* Receptors

EGF: *see* Epidermal growth factor
Endocrine systems, hormone pulsatility, quantification via approximate entropy algorithm, E741
Endometrium, stromal cells, IGF-I-dependent tyrosine kinase activity in, E863
Endothelin
interaction with ANP, cardiovascular, renal, and endocrine function, E135
stimulation, protein synthesis, smooth muscle cells, E412
Endothelin-1, central effects, vasopressin release, blood pressure, and renal excretion, E856
Energy
expenditure
dietary effects, postobese women, E282
fructose and glucose meals, obese women, E394
metabolic, ATP depletion and, skeletal muscle (chick), E637
metabolism, adaptive response to fasting and, E631
Epidermal growth factor, receptors: *see* Receptors
Epinephrine
caffeine ingestion, muscle metabolism and, prolonged exercise, E891
cortisol secretion and, adrenal glands (guinea pig), E806
glycogen metabolism and, myocardium, E875
Epiphyseal plate, ovine metallothionein 1a promoter-ovine growth hormone, effects on growth, E936

- Epithelial cells, retinal pigment, glucose inhibition of phosphatidylinositol synthase, E417
- 17 β -Estradiol, binding, plasma lipoproteins (trout), E712
- Estrogen, plasma calcitonin levels, basal and calcium-stimulated, age differences, E557
- Ethylene dimethanesulfonate, peripubertal FSH increase, termination of, E179
- Exercise
 exertion, heart rate and ammonia relations, McArdle's disease, E167
 fasting, control of fructose 2,6-diphosphate, muscle, E919
 glucose transport and, skeletal muscle membrane vesicles, E700
 LPL reduction in tissues and, serum free fatty acid effects, E377
 muscle, glucose transport and, E20
 muscle phosphorus energy state and, very-low-birth-weight infants, E289
 prolonged
 caffeine ingestion and muscle metabolism during, E891
 increased plasma FFA uptake during, E791
 resistance, growth hormone and, muscle growth in young men, E261
 rest, acute insulin presence, depancreatized dogs, E574
- Fasting
 adaptive response to, carbohydrate restrictions and, E631
 cAMP and, dephosphorylation of insulin receptor, E142
 glucose concentration, glucagon sensitivity and, liver, E539
 protein synthesis and, muscle, adult female, E1
 refeeding transition, hepatic metabolism in, pregnancy, awake state, E899
- Fatty acids
 free
 hepatic metabolism, pregnancy, awake state, E899
 increased plasma uptake, prolonged exercise, E791
 insulin-like growth factor I effects, E130
 lipolysis regulation of glucose production, E353
 regulation of lipoprotein lipase secretion, myocytes, E216
 rest and exercise, depancreatized dogs, E574
 serum-free, exercise-induced reduction of LPL in tissues, E377
 short-chain, systemic and regional kinetics, E197
- Fatty acid synthetase, genetic obesity, E608
- Feeding
 amino acid, leucine kinetics and, E687
 corticosterone rhythm associated with, paraventricular catecholamines in, E948
 dietary salt load, aldosterone metabolism, liver, E483
 food restriction, immature lung growth and, E240
 fructose and glucose meals, thermogenesis and, obese women, E394
 high-carbohydrate diet, energy expenditure and, postobese women, E282
- high-fat diet, adrenalectomy and, fatty Zucker rat, E32
- low-calcium diet, 25-hydroxyvitamin D₃ metabolism, E359
- meals, glucose and insulin responses to, circadian modulation of, E467
- milk, hepatic metabolism after, neonate (lamb), E46
- mixed meal ingestion, postprandial amino acid kinetics, E455
- Fetus: *see also* Lactation; Pregnancy
 CRF sequential injections, ACTH response to (sheep), E319, E325
 FFA: *see* Fatty acids, free
- Filtration, glomerular, ANP and endothelin interaction effects, E135
- Fluid, body, thromboxane monitoring of, E658
- Follicle-stimulating hormone, peripubertal increase, male, E179
- FRTL-5 thyroid cells, sodium-hydrogen exchange in, E834
- Fructose
 metabolism, thermogenesis and, E591
 thermogenesis and, obese women, E394
- Fructose 2,6-diphosphate, control in exercise and fasting, muscle, E919
- FSH: *see* Follicle-stimulating hormone
- Fura-2
 calcium mobilization stimulated by, SK-N-MC cells, isoproterenol treatment and, Galactose
- metabolism, after milk feeding, liver, neonate (lamb), E46
- Galanin
 circulating, anesthesia and (pig), E52
 release, liver, during sympathetic nerve stimulation, E671
- Gastrocnemius muscle, nonexercising, increased glucose transport in, E20
- GDP: *see* Guanosine diphosphate
- Gene expression
 protamine, ANP-producing tumors, E524
 tissue specificity, renin promotor activity, E644
- Gene regulation, uncoupling protein, response to cold, E58
- Genetics, adrenalectomy, high-fat diet effects and, E32
- Glucagon
 insulin-like growth factor I effects, E130
 sensitivity, fasting glucose concentration and, liver, E539
- Glucocorticoids
 central nervous system, brown adipose tissue metabolism and plasma insulin, E110
 lipoprotein lipase and, adipose tissue, E695
- Gluconeogenesis
 amino acid effects, healthy subjects, E826
 regulation, lipolysis and, E353
 release of amino acid, muscle, E155
 thermogenesis, fructose metabolism and, E591
- Glucoregulation
 exercise, fasting and, E919
 rest and exercise, depancreatized dogs, E574
- Glucose
 blood, increased FFA uptake during prolonged exercise, E791
- concentration, fasting, glucagon sensitivity and, liver, E539
- disposal, hyperglycemia and, E518
- dynamics, age and obesity effects, model, E755
- exercise-induced LPL reduction and, tissues, E377
- impaired insulin action and, muscle, E440
- inhibition, phosphatidylinositol synthase, retinal pigment epithelial cells, E417
- intraportal delivery, liver response to, hepatic nerves and, E679
- metabolism
 after milk feeding, liver, neonate (lamb), E46
 insulin-like growth factor I effects, E130
 regulation in myocardium, E875
 theory of production rate calculations, E779
- production
 hepatic, thermogenesis and, E591
 infused amino acid effects, healthy subjects, E826
 insulin sensitivity, spontaneous hypertension, E14
 mechanism of regulation, lipolysis, E353
 rest and exercise, depancreatized dogs, E574
- responses to meals, circadian modulation of, E467
- stimulus, uncoupling from secretion, B-cell release and biosynthesis, E150
- thermogenesis and, obese women, E394
- transport
 nonexercising muscle, E20
 skeletal muscle membrane vesicles, E700
 skeletal muscle, maturation and aging effects, E619
 transporter, erythroid, perineurial sheaths, E721
- Glucose 1,6-diphosphate, control in exercise and fasting, muscle, E919
- GLUT-1, crude membranes from muscle, perineurial sheath, E721
- Glutamine, interorgan metabolism, TNF and interleukin-1 effects, awake state, E275
- Glutathione, increased oxidative stress and, atrophied skeletal muscle, E583
- Glycerol, glucose production, regulation by lipolysis, E353
- Glycogen
 metabolism
 epinephrine and, hypercorticism effects, skeletal muscle, E427
 regulation in myocardium, E875
 synthesis, genetic models of hypertension, E191
- Glycogenolysis, muscle, caffeine ingestion and, prolonged exercise, E891
- Glycogen storage disease type V, ammonia relations, heart rate and exertion, E167
- Glycolysis
 insulin action, genetic models of hypertension, E191
 oscillatory, lactate released from β -cells, E800
- Glycylglutamine, release of amino acid, muscle, E155

- Gonadotropin, modulation of IGF binding protein production, ovarian granulosa cells (pig), E497
- G proteins, prostaglandin E_2 synthesis and, skeletal muscle, E476
- Growth: *see also* Development; Maturation
- lung, immature, food restriction effects, E240
- muscle, growth hormone and exercise effects, young men, E261
- Growth hormone
- deficiency, renal IGF-I and hypertrophy in diabetes, E956
- ovine metallothionein 1a promoter-ovine, effects on bone growth, E936
- potassium deficiency and, muscle, E511
- resistance exercise and, muscle growth, young men, E261
- Guanosine diphosphate, binding, aging effects, E185
- Heart
- developmental regulation, lipoprotein lipase, E330
- hypertrophy: *see* Hypertrophy, E569
- lipoprotein lipase release from, free fatty acid regulation of, E216
- Heart atria, tumors, ANP synthesis in, E524
- Heart rate
- endothelin-1 effects, E856
- exertion and, ammonia relations, McArdle's disease, E167
- regulation, angiotensin II, sympathetic nervous system, and baroreceptor reflex interactions, E763
- Hepatic nerves, response to intraportal glucose delivery and, liver, E679
- Hepatocarcinoma cells, glucose transport of, perineurial sheath, skeletal muscle, E721
- Hepatocytes, C-25 hydroxylation of vitamin D_3 , E810
- Histidyl-proline diketopiperazine, ontogeny of, pancreas, E845
- Hormones
- islet
- replacement, during islet suppression, E532
- replacement, glucagon sensitivity and, E539
- pulsatility, quantification via approximate entropy algorithm, E741
- D- β -Hydroxybutyrate, long- and medium-chain triglycerides and, leucine metabolism, E268
- 1 α -Hydroxylase
- 25(OH)-, dissociation, novel analogue of PTH, E483
- synthesis, intensity of lactation and, E840
- β -Hydroxy- β -methylbutyrate, oxidation of leucine and α -ketoisocaproate to (sheep, pig), E27
- 25-Hydroxyvitamin D_3 : *see* Vitamin D_3
- Hyperaminoacidemia, leucine and phenylalanine kinetics, type 1 diabetes, E203
- Hypertension
- aldosterone metabolism and, liver, E483
- central mineralocorticoid action in, E96
- insulin action, genetic models, E191
- insulin and, sympathetic neural support effects, E368
- spontaneous, stroke-prone, pressor activity of prorenin, E234
- without peripheral insulin resistance, spontaneous hypertension, E14
- Hyperthyroidism, β -adrenoceptor distribution, skeletal muscle, E504
- Hypertrophy
- cardiac, altered renal dopamine receptors during, E569
- renal, growth hormone-deficiency diabetes, E956
- vascular, endothelin effects on protein synthesis, E412
- Hypocalcemia, 1,25(OH) $_2D_3$ increase and, E211
- Hypoinsulinemia, insulin resistance and, insulin receptor function with, E818
- Hypothalamus
- sequential injections of CRF, ACTH response to, fetus (sheep), E319, E325
- ventromedial
- lesion, islet blood flow in obesity, E736
- obesity, insulin receptor kinase activity in, E161
- Hypoxia, ATP visibility, NMR, heart, E943
- IGF-I: *see* Insulin-like growth factor I
- IL-1 β : *see* Interleukin-1 β
- Immunoabsorbant assay, enzyme-linked, thromboxane monitoring of body fluids, E658
- Immunoreactivity, galanin-like, anesthesia and (pig), E52
- Infant, very-low-birth-weight, muscle phosphorus energy state, exercise effects, E289
- D-myo-Inositol
- calcium oscillations and, E307
- transport, upregulation, diabetic glomerular cells, E301
- Insulin
- action, genetic models of hypertension, E191
- acute presence, rest and exercise, depancreatized dogs, E574
- binding, maturation and aging effects, skeletal muscle, E619
- dynamics, age and obesity effects, model, E755
- glucose transport and, skeletal muscle membrane vesicles, E700
- glycogen metabolism and, myocardium, E875
- hepatic, EGF receptor phosphorylation, fetus, E6
- hyperinsulinemia, leucine kinetics and, skeletal muscle, E911
- hypertension and, sympathetic neural support effects, E368
- impaired insulin action and, muscle, E440
- insulin-like growth factor, glucose, lipids, and amino acid metabolism, E130
- isoproterenol and, β -adrenoceptor distribution in hyperthyroidism, muscle, E504
- leucine and phenylalanine kinetics and, type 1 diabetes, E203
- lipoprotein lipase and
- adipose tissue, E695
- myocytes, E663
- peripheral resistance, hypertension without, E14
- plasma, metabolism, glucocorticoids in the CNS and, E110
- protein synthesis and, muscle, adult female, E1
- receptors: *see* Receptors
- release, diazoxide and, pancreatic B-cells, E150
- responses to meals, circadian modulation of, E467
- secretion
- oscillations, islets of Langerhans, E800
- pancreatic islets, neurotransmitter effects, E338
- sensitivity
- fasting glucose concentration and, liver, E539
- short-term hyperglycemia and, E518
- testosterone exposure effects, muscles, female, E851
- sodium-phosphate cotransport and, osteoblastic cell line UMR-106-01, E389
- streptozotocin-diabetes, renin-angiotensin system downregulation in, E105
- Insulin-like growth factor binding protein, gonadotropin and cAMP modulation of production, ovarian granulosa cells (pig), E497
- Insulin-like growth factor I
- diverse effects, glucose, lipids, and amino acid metabolism, E130
- growth hormone effects and exercise and, muscle growth in young men, E261
- muscle, E511
- ^{125}I -labeled, clearance in protein restriction, E406
- oscillations induced by, cytoplasmic free calcium concentration, E307
- renal, growth hormone-deficient diabetes and, E956
- sodium-phosphate cotransport and, osteoblastic cell line UMR-106-01, E389
- tyrosine kinase activity dependent on, stromal cells, endometrium, E863
- Interleukin-1, TNF and, interorgan amino acid metabolism, awake state, E275
- Interleukin-1 β , intravenous injection, PGE $_2$ levels and, brain, E246
- Intestine
- amino acid metabolism, TNF and interleukin-1 effects, awake state, E275
- 25-hydroxyvitamin D_3 metabolism, low-calcium diet vs. calcitriol, E359
- leucine kinetics, amino acid supply effects, E687
- Iodide, uptake, sodium-hydrogen exchange effects on, FRTL-5 thyroid cells, E834
- Ions, bidirectional transport, thyroid, E40
- Iron, trace element movement, movement, oxidative stress and, atrophied skeletal muscle, E583

- Ischemia, cardiac, ATP visibility in NMR, E943
- Islets of Langerhans, lactate released from, oscillatory glycolysis, E800
- Isoleucine, protein metabolism and, E925
- Isoproterenol
- β -adrenoceptor distribution and, hyperthyroidism, skeletal muscle, E504
- NPY-stimulated calcium mobilization and, SK-N-MC cells, E383
- Isotopes
- condensation biosynthesis using, models, E118
- stable, tracer data, tracer-to-tracee ratio, model, E968
- Kallikrein-kinin system, brain, regulation of adrenocorticotropin release, E312
- Keratinocytes, benign and malignant squamous cells, PTHRP binding and signal transduction in, E599
- Ketoisocaproate, enteral and parenteral supply, leucine kinetics in relation to, E687
- α -Ketoisocaproate, oxidation, to β -hydroxy- β -methylbutyrate (sheep, pig), E27
- Ketone bodies, acetone kinetics, systemic and regional, E197
- Kidney
- altered dopamine receptors, development of cardiac hypertrophy, E569
- degradation, circulating galanin, during anesthesia (pig), E52
- developmental regulation, lipoprotein lipase, E330
- function, 1,25-dihydroxyvitamin D metabolism, aging and, E906
- 25-hydroxyvitamin D₃ metabolism, low-calcium diet vs. calcitriol, E359
- plasma flow, ANP and endothelin interaction effects, E135
- solute excretion, endothelin-1 effects, E856
- Kidney cells, glomerular, D-myo-inositol transport, diabetes, E301
- Kidney cortex, altered dopamine receptors, development of cardiac hypertrophy, E569
- Kidney glomerulus, D-myo-inositol transport, upregulation in diabetic cells, E301
- Kinase, activity, insulin receptor binding and, during lactation, liver (goat), E561
- Kinins, brain, regulation of adrenocorticotropin release, E312
- Lactate
- acetone kinetics, systemic and regional, E197
- interorgan metabolism, TNF and interleukin-1 effects, awake state, E275
- metabolism
- after milk feeding, liver, neonate (lamb), E46
- regulation in myocardium, E875
- oscillations, released from islets of Langerhans, E800
- production, muscle, exercise and fasting effects, E919
- Lactation: *see also* Fetus; Pregnancy
- bone mineral loss during, parathyroid tissue absence and, E230
- insulin receptor binding and kinase activity, liver and skeletal muscle (goat), E561
- intensity of, vitamin D synthesis and, E840
- Lactic acid, isoproterenol and, β -adrenoceptor distribution in hyperthyroidism, muscle, E504
- Leucine
- incorporation, muscle, uncomplicated surgery effects, E253
- kinetics
- insulin and amino acid infusion effects, type 1 diabetes, E203
- splanchnic and whole body, amino acid supply and, E687
- metabolism, lipid fuels and, E268
- oxidation, to β -hydroxy- β -methylbutyrate (sheep, pig), E27
- postprandial kinetics, mixed meal ingestion, E455
- protein metabolism and, E925
- protein synthesis and, muscle, E372
- Leucine carbon, kinetics, hyperinsulinemia effects, E911
- Leukocytes, mononuclear, corticosteroid receptors and lymphocyte subsets in, aging, E464
- Lipids
- fuels, leucine metabolism and, E268
- metabolism
- adaptive response to fasting and, E631
- insulin-like growth factor I effects, E130
- peroxidation, oxidative stress, atrophied skeletal muscle, E583
- Lipolysis
- carbohydrate restriction, adaptive response to fasting and, E631
- regulation, glucose production, E353
- Lipoprotein lipase
- adrenalectomy, high-fat diet effects and, E32
- developmental regulation, E330
- insulin and dexamethasone effects, adipose tissue, E695
- release, decavanadate effects, myocytes, E663
- secretion, myocytes, free fatty acid regulation of, E216
- tissue, exercise-induced reduction, serum free fatty acid effects, E377
- Lipoproteins, high-density, thyroxine binding in (trout), E712
- Liver
- acinus, C-25 hydroxylation of vitamin D₃, E810
- aldosterone metabolism, hypertension and, E483
- galanin release, sympathetic nerve stimulation, E671
- glucagon sensitivity, fasting glucose concentration and, E539
- glucose, galactose, and lactate metabolism, after milk feeding, neonate (lamb), E46
- glucose and insulin uptake, obesity and aging effects, model, E755
- glucose production, thermogenesis and, E591
- 25-hydroxyvitamin D₃ metabolism, low-calcium diet vs. calcitriol, E359
- insulin and EGF receptor phosphorylation, fetus, E6
- insulin receptors in, during lactation (goat), E561
- leucine kinetics, amino acid supply effects, E687
- metabolism, fasting-refeeding transition, pregnancy, awake state, E899
- purine metabolism, regulation of, E344
- response to intraportal glucose delivery, hepatic nerves and, E679
- LPL: *see* Lipoprotein lipase
- Lung, growth: *see* Growth
- Luteinizing hormone, peripubertal increase, male, E179
- Mammary gland
- AIB transport, prolactin effects, E402
- explants, prolactin effects on 2-deoxyglucose uptake, E627
- Maturation: *see also* Development; Maturation
- aging and, skeletal muscle glucose transport system, E619
- sexual, peripubertal increase in FSH, male, E179
- McArdle's disease, ammonia relations, heart rate and exertion, E167
- Melittin, ACTH response to, brain, E312
- Metabolic conditions, stable, during islet suppression, E532
- Metals, trace, movement, oxidative stress and, atrophied skeletal muscle, E583
- 3-O-Methylglucose, transport, nonexercising muscle, E20
- Microdialysis, brain, PGE₂ response to IL-1 β , E246
- Mineralocorticoids, receptors: *see* Receptors
- Minerals, bone, lactational loss, parathyroid tissue absence and, E230
- Models
- DIMSUM, multiexponential discrimination, E546
- equations, condensation biosynthesis, E118
- genetic, hypertension, insulin action in, E191
- glucose and insulin dynamics, age and obesity effects, E755
- glucose metabolism, theory of production rate calculations, E779
- hormone pulsatility, quantification via approximate entropy algorithm, E741
- tracer-to-tracee ratio, stable isotope tracer data, E968
- Monensin, sodium-hydrogen antiport and, FRTL-5 thyroid cells, E834
- Multiple indicator-dilution technique, C-25 hydroxylation of vitamin D₃, hepatic acinus, E810
- Muscle
- amino acid release, glycylglutamine and, E155
- exercise and fasting, control of fructose 2,6-diphosphate, E919
- growth, growth hormone and exercise effects, young men, E261
- impaired insulin action in, glucose and insulin effects, E440
- insulin receptor kinase activity, VMH obesity, E161
- insulin sensitivity, short-term testosterone exposure effects, female, E851
- metabolism, caffeine ingestion and, prolonged exercise, E891
- nonexercising, increased glucose transport in, E20

Muscle (*continued*)

- phosphorus energy state, exercise effects, very-low-birth-weight infants, E289
- protein synthesis
- leucine and valine infusion vs. flooding, E372
 - responses to fasting and insulin, adult female, E1
 - uncomplicated surgery effects, E253
- Muscle, skeletal
- atrophied, trace element movement and oxidative stress, E583
 - calcium-dependent protein breakdown, ATP depletion effects (chick), E637
 - exercise-induced LPL reduction, tissues, serum free fatty acids in, E377
 - glucose transport system, maturation and aging effects, E619
 - GLUT-1 distribution in, E721
 - glycogen metabolism, by epinephrine, hypercorticism effects, E427
 - hyperinsulinemia effects, leucine kinetics, E911
 - increased plasma FFA uptake, during prolonged exercise, E791
 - insulin receptors in, during lactation (goat), E561
 - membrane vesicles, glucose transport kinetics in, E700
 - prostaglandin E_2 synthesis in, E476
 - β -receptor distribution, hyperthyroidism, E504
 - sodium-potassium pump concentration, growth hormone effects in potassium deficiency, E511
- Muscle cells, smooth, protein synthesis in, endothelin effects, E412
- Muscle fibers, type, fasting and insulin effects on protein synthesis, E1
- Myocardium, glycogen metabolism in, insulin and epinephrine effects, E875
- Myocytes
- lipoprotein lipase release from, free fatty acid regulation of, E216
 - lipoprotein release from, decavanadate effects, E663
- Myophosphorylase, deficiency, plasma ammonia in McArdle's disease, E167
- Naloxone, renin release and, E100
- Natriuresis, endothelin-1 effects, E856
- Nephrectomy, prorenin effects, stroke-prone spontaneous hypertension, E234
- Neuropeptides
- circulating, anesthesia and (pig), E52
 - release, liver, during sympathetic nerve stimulation, E671
- Neuropeptide Y, calcium mobilization stimulated by, SK-N-MC cells, isoproterenol treatment and, E383
- Neurotransmitters, insulin secretion and, pancreatic islets, E338
- Newborn, milk feeding, hepatic metabolism after (lamb), E46
- Nifedipine, IGF-I effects and, sodium-phosphate cotransport, osteoblasts, E389
- Nitric oxide, cerebrovascular reactivity, diabetic brain, E447
- Norepinephrine
- energy expenditure and, high-carbohydrate diet, postobese women, E282
 - galanin release, liver, during sympathetic nerve stimulation, E671
 - hypertension, insulin and, E368
 - insulin secretion and, pancreatic islets, E338
 - paraventricular, feeding-associated corticosterone rhythm, E948
 - thermogenesis, aging effects, E185
- NPY: *see* Neuropeptide Y
- Nuclear magnetic resonance, carbon-13, glycogen metabolism, myocardium, E875
- Nutrients, oxidation, thermogenesis, obese women, E394
- Nutrition
- milk feeding, hepatic metabolism after, neonate (lamb), E46
 - protein restriction, clearance of 125 I-IGF-I in, E406
- Obesity
- adrenalectomy, high-fat diet effects and, E32
 - aging and, glucose and insulin dynamics, model, E755
 - β -cell tropin concentrations, body weight correlation (monkey), E963
 - genetic, pyruvate carboxylase, E608
 - increased blood flow, pancreatic islets, E736
 - insulin resistance, hypertension and, E368
 - insulin secretion, neurotransmitter effects, pancreatic islets, E338
 - postobese women, dietary effects on energy expenditure, E282
 - thermogenesis, fructose and glucose meal effects, women, E394
 - VMH, insulin receptor kinase activity, muscle and white adipose tissue, E161
- $1,25(\text{OH})_2\text{D}_3$: *see* Vitamin D_3 , $1,25$ -dihydroxy-
- Opiates
- antagonism, renin release and, E100
 - receptors: *see* Receptors
- Osmolality, changes induced by, cytosolic free calcium and aldosterone secretion, E68
- Osteoblasts
- adenylate cyclase, protein kinase C and, E87
 - sodium-phosphate cotransport, IGF-I effects, E389
- Ovarian granulosa cells, IGF binding protein production, cAMP and gonadotropin modulation of (pig), E497
- Ovariectomy, plasma calcitonin levels, basal- and calcium-stimulated, age differences, E557
- Ovulation, xanthine oxidase and dehydrogenase activities, ovarian tissues, E173
- Oxidative stress, trace element movement and, atrophied skeletal muscle, E583
- Oxotremorine, cerebrovascular reactivity, diabetic brain, E447
- Oxygen
- consumption
 - glycogen metabolism, myocardium, E875
 - thermogenesis, aging effects, E185
- Oxygen radicals, activities, ovarian tissue, E173
- Pancreas, TRH metabolism in, E845
- Pancreatic islets
- hormone replacement, glucagon sensitivity and, E539
 - increased blood flow, obesity, E736
 - insulin secretion from, neurotransmitter effects, E338
 - suppression, stable metabolic conditions during, E532
- Parathyroidectomy, lactational bone mineral loss and, E230
- Parathyroid hormone
- amino-terminal immunoreactive, $1,25(\text{OH})_2\text{D}_3$ increase and, E211
 - $1,25$ -dihydroxyvitamin D and, intensity of lactation, E840
 - metabolism, aging and, E906
 - novel analogue of, dissociation of phosphaturia and $25(\text{OH})\text{D}-1\alpha$ -hydroxylase using, E483
 - plasma, levels during $1,25(\text{OH})_2$ vitamin D_3 infusions, E126
- Parathyroid hormone-related protein, binding and signal transduction, benign and malignant squamous cells, E599
- Parathyroid tissue, absence, lactational bone mineral loss and, E230
- Paraventricular nucleus, catecholamines, feeding-associated corticosterone rhythm and, E948
- Peptides
- opioid, renin release and, E100
 - pituitary, body weight and, obesity (monkey), E963
 - release of amino acid, muscle, E155
- Perineurial sheath, GLUT-1 origination in, E721
- Pertussis toxin, protein kinase C and adenylate cyclase, osteoblast-like cells, E87
- PGE_2 : *see* Prostaglandin E_2
- pH, cytosolic, sodium-hydrogen exchange effects on, FRTL-5 thyroid cells, E834
- Pharmacokinetics, 125 I-IGF-I, clearance, protein-restricted rats, E406
- Phenamil, bidirectional anion transport, thyroid, E40
- Phentolamine, epinephrine effects on cortisol secretion and, adrenal glands (guinea pig), E806
- Phenylalanine
- kinetics, insulin and amino acid infusion effects, type 1 diabetes, E203
 - postprandial kinetics, mixed meal ingestion, E455
- Phorbol esters, protein kinase C and, osteoblasts, E87
- Phosphate, plasma, levels during $1,25(\text{OH})_2$ vitamin D_3 infusions, E126
- Phosphatidylinositol synthase, inhibition by glucose, retinal pigment epithelial cells, E417
- Phosphaturia, dissociation, novel analogue of PTH, E483
- Phosphoprotein phosphatases, fasting and, dephosphorylation of insulin receptor, E142
- Phosphoribosylpyrophosphate, purines and, liver, E344
- Phosphorus
- deficiency, exercise effects, very-low-birth-weight infants, E289
 - dietary, levels during $1,25(\text{OH})_2$ vitamin D_3 infusions, E126
- Pituitary gland
- kallikrein-kinin system, regulation of adrenocorticotropin release, E312

- sequential injections of CRF, ACTH response to, fetus (sheep), E319, E325
- Plantaris muscle, nonexercising, increased glucose transport in, E20
- Potassium, deficiency, growth hormone effects, muscle, E511
- Pregnancy: *see also* Fetus; Lactation
fasting-refeeding transition, hepatic metabolism during, awake state, E899
- Prolactin
AIB transport and, mammary gland explants, E402
2-deoxyglucose uptake and, mammary gland explants, E627
- Prolyl endopeptidase, ontogeny of, pancreas, E845
- Propranolol
epinephrine effects on cortisol secretion and, adrenal glands (guinea pig), E806
exercise-induced LPL reduction and, tissues, E377
- Prorenin, pressor activity of, stroke-prone spontaneous hypertension, E234
- Prostaglandin E₂
levels, IL-1 β intravenous injection effects, brain, E246
synthesis, modulation, skeletal muscle, E476
- Proteins
breakdown, calcium-dependent, ATP depletion effects, skeletal muscle (chick), E637
expression, genetic obesity, E608
restriction, clearance of ¹²⁵I-IGF-I in, E406
synthesis
 endothelin effects, smooth muscle cells, E412
 fasting and insulin effects, muscle, adult female, E1
 leucine and amino acid regulation of, E925
 muscle, leucine and valine infusion vs. flooding, E372
 muscle, uncomplicated surgery effects, E253
 turnover, food restriction effects, pre-term, E240
 uncoupling, gene regulation, response to cold, E58
- Protein kinase C, adenylate cyclase and, osteoblasts, E87
- Proteolysis, endogenous, amino acid kinetics during mixed meal ingestion, E455
- PTH: *see* Parathyroid hormone-related protein
- PTH: *see* Parathyroid hormone
- Pulse labeling, mouse renin biosynthesis, transfected cells, E224
- Purine, metabolism, regulation, liver, E344
- Puromycin, prostaglandin E₂ synthesis and, skeletal muscle, E476
- Pyroglutamyl peptidase I, ontogeny of, pancreas, E845
- Pyruvate carboxylase, genetic obesity, E608
- Radioisotopes, condensation biosynthesis using, models, E118
- Receptors
 β -adrenoceptor, hyperthyroidism, skeletal muscle distribution in, E504
arginine vasopressin, amiloride analogue antagonism of, E76
- corticosteroid, mononuclear leukocytes in aging, E464
- 1,25-dihydroxyvitamin D₃, TM4 Sertoli cell line, E884
- dopamine, renal, during cardiac hypertrophy, E569
- EGF, phosphorylation, hepatic insulin and, fetus, E6
- insulin
 binding, kinase activity and, during lactation, liver (goat), E561
 dephosphorylation of, fasting and cAMP effects, E142
 function, hypoinsulinemia and, E818
 kinase activity, muscles and white adipose tissue, VMH obesity, E161
 skeletal muscle glucose uptake, E440
 mineralocorticoid, hypertension in the Dahl S/JR rat, E96
 opiate, renin release and, E100
- Reflexes, baroreceptor, angiotensin II and sympathetic nervous system interactions, blood pressure regulation, E763
- REM: *see* Sleep, rapid-eye-movement
- Renin
 plasma, prorenin effects, spontaneous hypertension, E234
 plasma activity, ANP and endothelin interaction effects, E135
 promoter activity, tissue specificity of, E644
 release, opiate antagonism and, E100
- Renin-2, recombinant mouse, biosynthesis, transfected cells, E224
- Renin-angiotensin system
 blood pressure regulation, E763
 downregulation, streptozotocin diabetes, E105
 expression of genes, peripheral and central angiotensin II effects, E651
- Resistance
 insulin
 hypertension and, sympathetic neural support, E368
 obesity and aging effects, model, E755
 skeletal muscle glucose uptake, E440
 testosterone exposure effects, muscles, female, E851
- Respiratory quotient, fructose and glucose meals, obese women, E394
- Retinopathy, diabetic, glucose inhibition of phosphatidylinositol synthase, E417
- Rhabdomyosarcoma, atrial, ANP synthesis in, E524
- Rhythms
 circadian, glucose and insulin responses to meals, E467
 feeding-associated corticosterone, paraventricular catecholamines in, E948
- Ribonucleic acid, messenger, renin-angiotensin system, peripheral and central angiotensin II and, E651
- Ribose 5-phosphate, purines and, liver, E344
- Salt, resistance and sensitivity, aldosterone metabolism in hypertension, liver, E483
- Sarcolemma, GLUT-1 distribution in, E721
- Sepsis, cascade induced by, cytokine mRNA expression, E728
- Sertoli cells, 1,25-dihydroxyvitamin D₃ effects in, E884
- Sex differences, protein synthesis, fasting and insulin effects, muscle, E1
- Signal transduction, PTHRP binding and, benign and malignant squamous cells, E599
- Sleep, rapid-eye-movement, vasopressin reduction of, E295
- Sodium, monolayer cultures, anion secretion, thyroid, E40
- Sodium-hydrogen antiporter, monensin and, FRTL-5 thyroid cells, E834
- Sodium-phosphate cotransport, IGF-I effects, osteoblastic cell line UMR-106-01, E389
- Sodium-potassium-2 chloride symport, transport, thyroid, E40
- Soleus muscle, nonexercising, increased glucose transport in, E20
- Solutes, excretion, renal, endothelin-1 effects, E856
- Somatostatin, basal hormone replacement, during islet suppression, E532
- Somatotropin, growth hormone, exercise and, muscle growth in young men, E261
- Sorbitol, inhibition, phosphatidylinositol synthase, retinal pigment epithelial cells, E417
- Spectrometry, mass, condensation biosynthesis, E118
- Spectroscopy, ³¹P-nuclear magnetic resonance, ATP visibility in, heart, E943
- Sphingolipids, prostaglandin E₂ synthesis and, skeletal muscle, E476
- Squamous cells, benign and malignant, PTHRP binding and signal transduction in, E599
- Starvation: *see* Fasting
- Statistical analysis, DIMSUM, multiexponential model discrimination, E546
- Steele's equation, glucose metabolism, theory of production rate calculations, E779
- Steroidogenic enzymes, RNA, adrenal (guinea pig), E869
- Streptozotocin, response to, muscarinic receptor-mediated cerebral blood flow, E447
- Stromal cells, endometrium, IGF-I-dependent tyrosine kinase activity in, E863
- Surgical trauma, uncomplicated, muscle protein synthesis and, E253
- Sympathetic activity, dietary effects, post-obese women, E282
- Sympathetic nerves, stimulation, galanin release during, liver, E671
- Sympathetic nervous system
 angiotensin II and baroreceptor reflex interaction, blood pressure regulation, E763
 endothelin-1 effects, vasopressin release, blood pressure, and renal excretion, E856
 stimulation, galanin release during, liver, E671
 thermogenesis, fructose metabolism and, E591
- Sympathetic neural activity, hypertension, insulin resistance and, E368
- Tensor fasciae latae, protein synthesis, responses to fasting and insulin, adult female, E1
- Testis, 1,25-dihydroxyvitamin D₃, TM4 Sertoli cell line, E884

- Testosterone
peripubertal FSH increase, termination of, E179
short-term exposure, insulin sensitivity and, muscles, female, E851
- Thermogenesis
aging effects, E185
fructose and glucose meal effects, obese women, E394
fructose metabolism and, E591
uncoupling protein gene regulation, response to cold, E58
- Thermoregulation, uncoupling protein gene regulation, response to cold, E58
- Thromboxane, monitoring of body fluids, E658
- Thyroid, bidirectional ion transport in, E40
- Thyroid hormones
binding, plasma lipoproteins (trout), E712
uncoupling protein gene regulation, response to cold, E58
- Thyrotoxicosis, β -adrenoceptor distribution, skeletal muscle, E504
- Thyrotropin-releasing hormone, metabolism, pancreas, E845
- Thyroxine, binding, plasma lipoproteins (trout), E712
- TRH: *see* Thyrotropin-releasing hormone
- Triacylglycerol, exercise-induced LPL reduction and, tissues, E377
- Triglycerides, long- and medium-chain, D- β -hydroxybutyrate and, leucine metabolism, E268
- 3,5,3'-Triiodothyronine, binding, plasma lipoproteins (trout), E712
- Tropin, β -cell, body weight correlation, obesity (monkey), E963
- Tumor necrosis factor, interleukin-1 and, interorgan amino acid metabolism, awake state, E275
- Tumor necrosis factor- α , sepsis-induced cascade, cytokine mRNA expression, E728
- Tyrosine kinase
activity
insulin receptor binding and, during lactation, liver (goat), E561
maturation and aging effects, skeletal muscle, E619
hepatic growth and, fetus, E6
IGF-I-dependent activity, stromal cells, endometrium, E863
- Urine, oxidation of leucine and α -ketoisocaproate, β -hydroxy- β -methylbutyrate (sheep, pig), E27
- Vagotomy, increased islet blood flow, obesity and, E736
- Valine, protein synthesis and, muscle, E372
- Vanadium compounds, lipoprotein lipase release and, myocytes, E663
- Vasopressin
arginine
amiloride analogue antagonism of, E76
ANP and endothelin interaction effects, E135
regulation of sleep, reduction of REMs, E295
release, endothelin-1 effects, E856
- Vitamin D
deficiency, maintenance of normocalcemia in, E126
- 1,25-dihydroxy, metabolism, aging and, E906
1,25(OH) $_2$, synthesis, intensity of lactation and, E840
25(OH)D-1 α -hydroxylase, regulation with PTH analogue, E483
- Vitamin D $_3$
C-25 hydroxylation of, hepatic acinus, E810
1,25-dihydroxy-hypocalcemia effects, E211
TM4 Sertoli cell line, E884
25-hydroxy-, metabolism, low-calcium diet vs. calcitriol, E359
1,25(OH) $_2$, maintenance of normocalcemia in, E126
- Vitamin E, metals and oxidative stress, skeletal muscle atrophy, E583
